Attendance at Oyen's Fourteenth Annual Summer Fair and Stampede Established New High Record

Fine Weather Favors Huge Holiday Crowd

Stampede Events Proved Splendid Entertainment

Oyen Defeat Chinook in Snappy Ball Game 7-5

Oyen's fourteenth annual summer fair and stampede passed into history last Friday with a new record for attendance attained. Exhibits in the live stock classes made a splendid showing, a greater variety of exhibits being noticeable. Bull exhibits showed a slight falling off in numbers but a very high standard of quality was maintained. Exhibits of grains and grasses were exceptionally good.

The officers and directors in charge of entertainment, made a very happy choice in deciding to hold a stampede in addition to the baseball and horse racing events. The record breaking attendance may be largely attributed to the stampede, which was well handled and provided excellent sport for the spectators.

The ball game between Oyen and Chinook was keenly contested. For five innings it was a pitchers battle, each side having scored only one run, but the twelfth overcast and rain were called upon. Oyen finished with the long end of a 7-5 score.

In the horse racing events, Wilson of Sedalia took first in the open running, with Wright, Excel, 2nd, and Thompson, New Brigden, 3rd. The pony running race went to: Wright, Excel, 1st; Gibson, Oyen, 2nd; and Wilson, Sedalia, 3rd.

The winners of the stampede events were:

Bucking Contest—1st J. Baxter of Monitor, riding "Pinto Wonder"; 2nd F. Buckway of Monitor, riding "Dick's Special"; and E. Watrin of High River, riding "Jazz Baby".
Calf Roping—1st A. Fisher of Bindlose, tied for 2nd S. Foster and A. Fitger, both of Bindlose. (2nd and 3rd money divided).
Wild Cow Milking—1st J. Fitger, 2nd J. Nash, 3rd J. Baxter.
Wild Horse Race—1st E. Watrin, 2nd Dick Hosfeld, 3rd J. Baxter.

Steer Riding—1st "The Manitoba Kid" (J. Hunt), 2nd A. Fisher, 3rd Leo Staggs.

The Prize Winners

Horses

Class 1—Saddle for Boys and Girls
Sec. 1, Saddle pony, 14 hands or under—1st Geoffrey Holloway, 2nd Dave Warwick.

Class 2—Saddle for Ladies
Sec. 1, Saddle horse, 15 1/2 hands or under—1st Howard Cates, 2nd Arthur Gibson.

Industrial Development In Canada

TWO SEAPLANES CARRY MATERIAL TO H.B. TERMINAL

Ottawa, Ont.—Remarkable feats have been performed and more are being attempted this year for the Hudson Bay terminal project. Two seaplanes, under the guidance of Flight Officer James, of the Royal Canadian Air Force, are making two flights daily between Nelson and Churchill, transporting men and material from Nelson to the New Hudson Bay railway terminal.

Each plane is doing 600 miles a day. In addition to large amount of material transferred by the seaplanes within the past month or six weeks, 116 men who have been working at Churchill without any mishap.

The men have also taken photographs for use by the topographical survey branch of the Department of the Interior, and are preparing the equipment they are taking to the two harbors. At present 225 men are at work at Churchill and 200 remain at Nelson dismantling the equipment there and preparing it for transfer to Churchill. Eventually practically all of these men will have been moved to Churchill.

A large amount of transfer work is being done by boats, the material from Nelson being taken to the two temporary docks constructed.

Another big project now being done by the Hudson Bay terminal is the towing to Churchill this summer of the two dredges from Montreal.

Barring accidents it is expected the two dredges will reach Churchill by September 20, too late to do much work this year. Their real performance will commence next summer.

The dredges and their convoys will represent a value of over \$1,000,000. The two dredges cost \$400,000 each, in addition to which will be a large quantity of material on at least one of the convoys.

Three hundred thousand feet of lumber is now being loaded at New Westminster, B.C., ready to leave next Sunday to journey southward over the Pacific coast, through the Panama Canal and thence to Hudson Bay. She is expected to reach Churchill about September 15, after which she will be ordered to leave Halifax at an early date.

Tunny Retains Championship

Heaney Succumbs To Technical Knockout In Eleventh Round

Yankee Stadium, New York.—Blinded and staggering, his face a bloody smear, Tom Heaney, the hard-fighting Canadian, was forced to yield a victim to a technical knockout in the eleventh round of his world's heavyweight championship battle with Gene Tunney.

Tunney, born and bred in New York, and defending his title at home for the first time, cut the sturdy, courageous New Zealander to pieces, subjecting him to one of the worst beatings a challenger ever received.

The spectators may Heaney went into unbroken slaughter through round after round, as Tunney, the master boxer, lashed his face with left hooks and pounded his head with vicious solid rights.

Heaney came charging in like a bull, but the elusive Tunney, cool and collected, evaded his wild rights to the jaw and stabbed him with lefts to the face until the Canadian, with the gloves against Heaney's cut and bruised face almost became monotonous.

Noble Reaches Norway

Harbor Workers Refuse To Handle Hopes Return From Ship To Dock

London.—With a flag at half mast, the supply ship *Città di Milano* with General Umberto Noble and the survivors of the Italian disaster on board, arrived at Narvik, Norway, and a Central News despatch from that city.

The arrival, added the dispatch, was watched with silent interest by the harbor workers who refused to handle the ropes thrown from the ship to the docks.

The attitude of the Norwegians toward the Noble party was caused by the reports of the desertion of Dr. Malmgren, Norwegian scientist, with the expedition, who was injured and left behind.

Canada's hares produce over 200 million dozen eggs in a year, worth \$80,000,000.

W. N. U. 1714

Phone Call From London

Moore Jaw Station Conveys With British Metropolis In Test Talk

London, England, speaking, how do you hear me?

This question was asked by a voice speaking 6,000 miles away while the listener was a Moore Jaw man, J. A. Inch, vice chief of the local test phone office. For two or three minutes Mr. Inch conversed with the test operator from the metropolis of England, some 6,000 miles away, and he could hear him clearly through out the conversation.

The test call was put in from the British Isles to Saskatchewan to determine the efficiency of the long-distance system recently inaugurated whereby a person in the West can converse with anyone in the Old Country.

Veteran Mountie Dead

Captain Henry Enlisted When Force Was Being Organized

Edmonton.—One of the two last survivors of the original troops of the Royal Northwest Mounted Police to reach the plains in 1874, Capt. Sir Charles Lindbergh, 78, died at the sixth baronet of Tralee Castle, County Kerry, Ireland, died in a local hospital on July 24.

He was born at the age of the first and enlisted at Ottawa in the R.N.W.M.P. which was just being organized. Lindbergh was the rank and file Inspector in the force and was one of the officers to sign the famous treaty of 1877 with the Indians.

In his years Sir Cecil Denby has been acting as an archivist for the Alberta Government, and has written several books on early life in the west.

Nova Scotia Reports Few Men Available

Cannot Supply Number Asked For To Assist In Western Expedition

Halifax.—The department of national resources has notified the minister of the Western expedition that Nova Scotia would be unlikely to supply more than 75 per cent. of the number asked for to assist in the harvesting of the Western wheat crop.

It was stated that owing to the increased activity in the province in building and mining industries, the number of men who will go on the harvest campaign from Nova Scotia would not be more than 1,200.

Find Wreckage Of Plane

Idea Is Advanced That It May Explain Fate Of Nungesser-Coll

Copenhagen.—A fragment of aeroplane wreckage, with some silver and bronze colored fabric attached to it, has been picked up off the Jutland Coast.

The belief that the wreckage may possibly be part of the Nungesser-Coll plane lost last year, the fragment has been sent to Paris for identification. The wreckage was found by Dr. Frode, a Danish physician. There was a wireless receiver among the fragments.

Heads Teachers' Federation

Winnipeg Man Is Elected President For Coming Year

Winnipeg, C. W. Ludlow, B.A., principal of the Macbray junior high school, Winnipeg, was elected president of the Canadian Teachers' Federation at the ninth annual conference here.

The other officers of the association for the coming year are C. B. Braden, J. J. Sumner, P.E.I., who was given the majority vote over C. H. Sweet, of Alberta, for vice-president, and Alderman M. J. J. Caldwell, of Regina, who was re-elected secretary-treasurer of the organization.

Will Investigate Noble Charge Rome—Italy's inquiry into the conduct of the Noble expedition, which was ordered by Premier Mussolini to still hostile criticism throughout Northern Europe, is expected to be opened late in September or early in October. It is believed that it will be directed by Mussolini himself.

Hall Hints Crop Saskatoon.—Heavy grain crops, almost ready for the harvest, were completely wiped out at many points in central Saskatchewan last week by hail which accompanied the worst electrical storm to have swept this district in a decade.

Plan Visit To States New York Field-Marshal Lord Allenby and Lady Allenby have planned to visit this country, and are due to land here October 2.

Balfour At Eighty

Distinguished British Statesman Has Been Adviser To Three Sovereigns

London.—Great Britain celebrated recently the 80th birthday of one of the most distinguished statesmen, the Earl of Balfour. Lord Balfour's public service goes back back 44 years, for he entered the House of Commons in 1874, and he is one of the few great survivors of the Victorian era. He was adviser to three successive sovereigns.

The only other statesman of outstanding eminence in the period since the death of the Earl of Rosebery, he has been out of politics for 20 years and is an invalid. Earl Balfour is a member of the cabinet today, being Lord President of the Council.

Notwithstanding the throat infection which laid him aside during the winter and spring, he is again normally active. His recent illness necessitated a rest from his usual physical activities, but he is now back of which he was a devoted player, but the Daily Mail quoted him recently as saying that he intends to take up tennis again shortly.

Lindbergh's Earnings Large

Federal Tax Payments This Year

Washington, D.C.—During the latter part of 1927, according to reliable calculations, the earnings of Col. Charles Lindbergh of the United States, for his flight across the Atlantic, far exceeded \$200,000. His federal tax payments this year amount to \$20,000. He started his earnings by winning the \$25,000 prize for being the first to fly the Atlantic in Paris. For touring the United States he received \$200,000 a day from the Guggenheim Foundation.

He is now in the United States, and is expected to return to the United States in the near future.

WILL CONSIDER MORE PLANS TO AID IMMIGRATION

Ottawa, Ont.—The announcement by Right Hon. Winston Churchill that the British government is prepared to spend more money in stimulating British immigration to Canada has created deep interest at Ottawa. While officials of the immigration department are unaware of the various plans suggested, it is expected that Lord Lovat, who will arrive in Canada shortly, will have complete details.

All of the proposed policies with the exception of the boy immigration scheme are either new or are schemes which have been suggested by the Canadian government and related by the British government.

This is true, particularly of the proposal to give to settlers a substantial loan to aid them in commencing farming. The Canadian government obtained the consent of the British government in the 1900 family scheme, to an agreement whereby the British Treasury advanced \$100,000 to the Canadian government to be repaid by the Canadian government in the form of a loan to aid them in commencing farming.

The packages were addressed to Lun How, a local Chinese merchant, and were thought to have come over on a liner recently arrived from Asiatic ports.

The seizure was made by provincial police assisted by officers of the customs preventive staff.

Lessening Fire Hazard Winnipeg.—Rain is gradually lessening the fire hazard of the forests of Northern Manitoba districts, and according to forestry officials here is to 20 to 30 inches which the Royal Air Force and the fire rangers have been fighting strenuously during the past month, are gradually petering out under the drenching.

Honey Exports Increase Rapidly

Canadian Product Regarded With High Favor In Europe

Well established markets for Canadian honey appear to have been gained in Germany, Holland, Great Britain and France. Exports to Germany have more than trebled in the past four years, that country taking 48,000 pounds in last fiscal year. Holland and Great Britain also only in the neighborhood of 400,000 pounds compared with only 8,000 pounds in the previous year. Altogether exports of honey from Canada were a half million pounds greater than in the previous year, amounting in all to approximately 2,100,000 pounds.

In Europe, Canadian honey is regarded with high favor and is clear proof of the esteem in which it is held could be asked for than the fact that exports to European countries are four times what they were just five years ago. The rapid expansion of export market should be an incentive to the keeping of more bees.

Canada's honey production last year amounted to \$2,100,000, valued at \$2,750,000 according to preliminary estimates recently issued. That this is a considerable small amount of honey compared with the Dominion can produce, for according to Mr. C. W. Goodrich, Hamilton, Ontario, there are still large areas of Canada totally unexploited so far as bee-keeping is concerned and which have possibilities just as great as any district in which the industry has been developed.

Particularly is this true of the Western Provinces, and it is in that area that most rapid progress is being made. Manitoba produced over seven million pounds of honey last year, failing not far short of Ontario, which is the leading province in honey production. The introduction of sweet clover into Manitoba is largely responsible for the increase in bee-keeping, and this is a factor also in Saskatchewan where the number of colonies of bees is increasing very rapidly.

The culture is the means of obtaining a natural pure food product of great excellence for human consumption, and which exists in great quantity in the native-producing forests of Canada. Thousands of tons of honey are going to waste annually in Canada for want of bees to gather it, the only crop which can be harvested with free labor, besides which they have been one of the greatest producers of seed and fruit because of their beneficial work in cross pollination of various economic plants and trees.

Cannot Come To Soon

Unit In Time-Resistant Driver Will Be Eliminated

Some day the reckless driver will be eliminated. Before a time-resistant driver is put at the throttle of an engine driving a passenger train he must have proved his ability where his engine and his supervisor have satisfied themselves that he has what is known as a level head. Level is placed in his ears. It is the same not true of the driver of a car? The reason for allowing the half-brained drivers freedom of the road without restraint is obscure just now, but eventually a car driver will have to be qualified in more ways than mechanically.

Waterton Lakes National Park. Waterton Lakes National Park is situated in southern Alberta, and has an area of 220 square miles. The southern limit of the park is the International Boundary between Canada and the United States, and this line is the northern boundary of the United States Glacier National Park.

Frozen Desserts Simple To Prepare

No More Difficult To Make Than Many Popular

A simple frozen dessert is no harder to make than many puddings and most pies, points out Florence Tait, of the "Successful Farming." "Frozen foods," she says, "should be offered more frequently for salubrious and desserts. They are cooling and healthful, and when we rid ourselves of the idea that their preparation will not seem a burden."

The chief thing, she declares, is to have materials that are adequate, conveniently at hand, and in good order. "Conventional necessities, other than the freezer, are rock salt, ice, a heavy mallet, stout bag, and measure. Proportions of ice and salt are three measures of finely-cracked ice and one of salt. Pack solidly, turning back occasionally to settle ice, and pound the ice firm with the mallet handle. Turn crank slowly at first, then more rapidly. When mixture is stiff, draw off the water, take out powder, pack cream solidly, put in the cover and re-pack freezer.

"Water ices," continues Mrs. Tait in "Successful Farming," "are easily made from various recipes by freezing an extra and rather rich cream with sugar, fruit juice and ice. A good general rule is as follows: Beat one quart of cream with water and half cupful of sugar five minutes. Cool and add a cupful of pure fruit juice and one cupful of water, and a little lemon juice."

"Sherbets are made by adding the beaten whites of one egg to this cream. The mixture should be stirred not too rich, but delicious, may have a flavored custard for a foundation, and may be made with fruit. It is a delight to hold milk in the double boiler and add two eggs beaten slightly with one cupful of sugar, a pinch of salt and the tablespoonful of flour. Shake the sugar and flour together before mixing with the eggs. Cook, stirring, until smooth and thickened, then add the cream and water.

Color Cautions

Choosing Colors Should Be A Matter Of Some Consideration

1. No person can wear all colors successfully.

2. The color and texture of the skin determines the color most suitable for clothing. A person with an olive complexion, for example, can wear deep green, bronze, green, deep red, and even purple in some cases. If the skin is fair in texture, these colors may be worn, but they must be subdued and softened. "Ragged" colors, in other words, so that they do not contrast too strongly with the skin. A skin that is more pink, than yellow can wear past colors, but not all of these. A skin usually have blue, hazel, or very brown eyes. They may have blond, brown, white or black hair. A pale skin can wear dark brown and black, but perhaps better than any other color.

3. Subdued or grayed colors are most becoming to large features.

4. Colors should be chosen to bring out the best of the individual either the skin, the hair, or the eyes. If the skin is fine, you may wear satin, or velvet, or a non-transparent material with a sheen. If the texture of your skin is coarse, gorged, dull, crepe, or crepe Elizabeth would be more becoming.

5. Gay colors may be worn more successfully by young girls than the intense or pure colors should be avoided since they are becoming to very few.

6. Bright colors, if carefully chosen, are quite suitable for sport clothes and evening gowns.

7. Study carefully your own coloring and choose those most suitable for your own type, age, and position. From Successful Farmers.

Business Was Extensively Forged

A commercial traveler was working in a new district, and orders were few and far between. Entering an establishment, he presented his card, only to be told that there was really nothing in this line that was wanted.

"Will you permit me to show you a few of our leading articles?" begged the salesman.

"No sir," was the reply. "We really cannot spare you the time at present."

"Well, sir," persisted the salesman, dejectedly, "would you mind if I opened my bag here and took a look myself? I haven't seen 'em for nearly three weeks."

How Could They

Mrs. Smith—"This fellow thinks he can sing like Caruso."

Mrs. Brown—"Well, they do say so 'ow Caruso 'ad a beautiful voice, but 'ow could they know, with 'im stranded on that island with nobody to hear him but Friday?"

Sheep Breeding Experiments

Hamboullet Grades Give Highest Quality Of Wool

The Scott, Saskatchewan, Experimental Station is carrying on a flock of the use of Shropshire, Cheviot, and Hamboullet sires. Three flocks of grade ewes, numbering twenty-five, constituted the breeding stock, each headed by a ram of one of the breeds named. Each flock is annually reduced to twenty-five ewes, and about thirty lambs are born in feeding experiments, and cross the wool breeding stock is selected. This work has not gone on sufficiently to enable a definite comparison to be made between the different breeds for grading use. The wool clip, however, can be compared with 1927 amounted to an average of 8.1 pounds from the Shropshire grade, 7.4 pounds from the Cheviot grade, and 8.9 pounds from the Hamboullet grade. The wool was marketed through the Co-operative Wool Growers' Association. Each fleece was tagged at the time of shearing, and after the wool had been graded, the tags were returned to the station. A table representing the wool grading published in the report of the station for 1927, and available at the Publications Branch of the Department of Agriculture, at Ottawa, shows that the Rambouillet grades gave the highest quality of wool, the Cheviot grades the lowest, and the Shropshires occupying a midway position.

To Make Tests At Olympics

Dr. C. H. Bert, well known Toronto doctor who, collaborating with Dr. Brantling in the discovery of insulin, has been sent by the Commonwealth Laboratories to the Olympic games to study the effect of exhaustion of athletes. Dr. Bert has in connection with his work at the Commonwealth Laboratories, already made considerable study in this line at Toronto University.

The first coated tasteless pill was made by a Brighton, England, chemist in 1859.

NEW TYPE FRUIT CAR

For the transport of fruit from the Fraser and Okanagan districts in British Columbia, the Canadian National Express has developed a new fruit car in service a new type of rail-carried fruit car. While this method does not develop a low temperature as ice, the process is more natural and as fruit does not deteriorate as quickly when removed to the warmer interior.

The cars are ordinary baggage or express merchandise cars, 60 feet long, which have been equipped with special ventilating devices, consisting of ten metal air inlets and a channel placed in a staggered position, five on each side of the car, in carry, through the channel into a channel under a raked false flooring. There are also eight metal air exhausts, staggered four on each side, which carry off the gases and foul or warm air thrown off by the fruit and vegetables. The inlets and exhausts lead to the outside of the car. The inlets are so arranged that they bring cool air into the car irrespective of the direction in which the car is moving.

Raspberries In Saskatchewan

Highly Satisfactory Yields Reported As Insects Harm

Given suitable winter protection raspberry plants come through the winters in Saskatchewan in very good condition. At the Indian Head Experimental Farm the raspberry canes are bent over each autumn and covered with a few inches of soil. With a deep covering of snow such a procedure may not be necessary, but the uncertainty of the snow blanket makes it doubly safe to use the earth covering. In his report of the Farm for 1927, published by the Department of Agriculture, at Ottawa, the Superintendent, Mr. W. H. Gibson, points out that covering the canes with soil has the advantage of protecting them from injury by rabbits and the ill effects from freezing and thawing in the spring. Last year the superintendent reports a highly satisfactory yield of berries was harvested from the canes of the different varieties that reached average yields from fifty to sixty bushels. Six or eight strong canes were left in each hill to bear fruit next year, when the expected crop will be recorded with other data that will be reported for those interested in the findings of the Farm.

A High Official

Fire Ranger Occupies Station 9,000 Feet Above Sea Level

The highest official in British Columbia, in point of altitude, is the fire ranger occupying a look-out station on Mount Sir, in the Revelstoke district, 9,000 feet above sea level. Even in summer weather he obtains his water supply from snow. Telephone connections with the district headquarters enables him to turn in an alarm which can bring an army of fire fighters to the scene in thirty minutes.

From his exalted station this ranger guards an area containing 300 billion feet of British Columbia timber.

A blunt remark invites a sharp answer.

The Imperial University of Tokyo is the largest in the world.

WHEAT SHORTAGE IN RUSSIA

Soviet Economic Policy Is Leading To Dangerous Consequences

Recent months of an impending grain shortage in Soviet Russia are confirmed by heavy purchases of Canadian wheat. It is a case where the Soviet government, by its policy of not buying Canadian grain for the fun of it. They are doing so because the domestic situation makes it necessary. The explanation for the shortage is simple, but its possible consequences are complex and even dangerous to somebody.

The peasants of Russia are refusing to produce a surplus over and above their own needs because it is useless for them to do so. They cannot buy clothing or manufactured goods in return for such a surplus except at discouragingly exorbitant prices. Why should they toil and sweat for no purpose? This is the policy which that breaks the strongest arguments of the theorists, and nullifies the harangues of the local Communist Commissioners.

For months, even years, the rulers of the Russian Communist Party have foreseen some such a crisis. They faced it once before in the early days of the Revolutionary Government. At that time Lenin, who was not new in anything but name, it was nothing but a partial restoration of the old right to free trade, purchase and sale.

The Soviet hierarchy have always realized that Lenin's policy was a makeshift. They were on the horns of a dilemma. If they adopted the New Economic Policy to continue, the complete restoration of the capitalist system was only a matter of time. If they abolished it, they restricted it, difficulties with the peasants were inevitable.

But his fiery little group of fanatics always insisted on the latter course. They urged that trouble with the peasants was the lesser of two evils, and that the military conditions at home might be offset by military expeditions abroad. The strange thing is that, while Trotsky's group was completely dominated by Stalin, in the party fight, the radicals were no longer expelled than the vulgar themselves, and largely toward the left.

During the past few months the private traders have been harnessed anew. Prices have risen sharply. The stage is set for some kind of a new scene. The world cannot afford but to watch intently. — Toronto Globe.

HAVE AIDED DEVELOPMENT

Some Of World's Wealthiest Mines Found By Animals

One of the richest copper strikes on Vancouver Island was made by a dog, according to Harry Turner, well-known mining man who has just returned to Victoria from a prospecting trip.

Turner's dog was a companion on one of his trips and sought to rival his master in the discovery of "gold." One day on the west coast of Vancouver Island Turner heard his dog barking persistently and went to see what it was about. To his astonishment he found the dog scratching around a rich outcrop of copper which development proved to be one of the richest strikes on the island.

The story of the donkey which located the famous Hunter Hill and Sullivan mines in the Cariboo district has been told. That donkey was pensioned for life as its reward. Several mineral discoveries have been made in the past of float found on the dumps and holes dug by bears in their search for grubs. The despised pack animal has proved to be one of the best prospectors, and many a miner has told how his mine was due to a pack-rat stealing his supplies and leaving the stolen goods by pieces of quartz carrying gold which led to the discovery of a valuable quartz vein. The Cariboo story is told of a rich placer strike having been made as the result of a pack-rat trailing home to the prospector's outfit gold nuggets, as if that rodent was more than honest in making compensation for his crime.

The people of Doris, by public subscription, can have something a la carte.

"Sure, why?"

"I wanna see the water wheel it has."

Film Crier: "But look here, it's going to throw me into the rapids and I'm a pacifist to get out."

Producer: "Oh, that's all right; you don't appear angry."

Japanese Learning English

Desire To Learn Language Aimed Universal But Means Are Inadequate

The attendance of 4,000 persons, a virtually all of them Japanese, at a dramatic tournament in Tokyo, conducted in the English tongue, brings out graphically the tremendous hold that language has acquired in eastern Asia. It may well be wondered whether 4,000 persons would attend a similar tournament in New York or some other city of the United States if it were conducted in, say, the French language.

The discussion of manufacturing of world language becomes academic in view of the world conquest which the English language is actually making today, and perhaps in no other country is that as widespread and successful as in Japan. The study of English is compulsory there from the sixth grade upward. English aligns about the world's language empire, and there is scarcely a Japanese who does not speak at least a few words of this tongue.

The intensive drive to acquire English on the part of the Japanese nation is not due to propaganda or to a desire to be in Japan. The study of English is compulsory there from the sixth grade upward. English aligns about the world's language empire, and there is scarcely a Japanese who does not speak at least a few words of this tongue.

The progress that the English language has made in Japan is remarkable. It is not only a language of commerce and phrases from English for this purpose, such as English fees free to draw upon Greek and Latin for certain terms, and has drawn upon French in the past for diplomatic vocabulary. As regards Japan, the fact that the bulk of that nation's foreign trade is with the English-speaking people is an added incentive to the young Japanese looking forward to making their mark as a successful career.

The progress that the English language has made in Japan is remarkable. It is not only a language of commerce and phrases from English for this purpose, such as English fees free to draw upon Greek and Latin for certain terms, and has drawn upon French in the past for diplomatic vocabulary. As regards Japan, the fact that the bulk of that nation's foreign trade is with the English-speaking people is an added incentive to the young Japanese looking forward to making their mark as a successful career.

People have widely different notions as to what constitutes a good time.

An Englishman can leave his property away from his family; a Scotsman cannot.

"How did you fight again?"

"One is a pacifist and the other an anti-militarist. One said the other thought less of peace than he did, and so they started to settle it." — Kasper, Stockholm.

August Proves a Good Month For Transplanting

August proved a good month for transplanting plants in the Indian Head Experiment Station. At that season of the year fresh roots are developing and, according to the superintendent, in his report of the farm for 1927, published by the Department of Agriculture, at Ottawa, the work might have been done even a little earlier with no disadvantage. Finely divided hydrated lime was incorporated with the soil at the time of transplanting. The following year fine blooms were produced between the 20th of June and the 19th of July. Of the thirty varieties grown at the Indian Head Farm, Wyoming, Ontario, Gages, Albert Victor, Eldorado, Para de Neuilly, and the variety named "Vanguard," Mrs. H. Darwin, Salvadori, and Celeste, deserved special mention.

"How did you fight again?"

"One is a pacifist and the other an anti-militarist. One said the other thought less of peace than he did, and so they started to settle it." — Kasper, Stockholm.

Here and There

(81) The Duchess of Bedford, latest addition to the Canadian Pacific fleet of passenger liners on the Atlantic, is the first of four cable class vessels being constructed for the Canadian Pacific to carry to the company's service on the St. Lawrence route, and they will also be used for winter cruise purposes.

Winnipeg.—According to statistics recently collected from 24,162 farms, there are 6.8 barns to each farm in Manitoba and a tractor to every 4.6 farms in the province. Each Saskatchewan farm has 10.2 horses and there is one tractor to every 4.7 farms in Alberta, there are 10.8 horses to each farm and one tractor to every 7.5 farms.

Ottawa, Ontario.—Employment stood at a higher level in Canada in April, 1928, than in any April as far back as records go. Returns from headquarters of labor with working places aggregating \$42,940 persons showed the employment index standing at 101.1, as compared with 96.2 in April, 1927, and 94.1 in April, 1926.

Winnipeg.—Home-stead entries in the four Western Provinces for the first quarter of the year totalled 1,516, as compared with 1,539 in the first quarter of 1927. Filings in Manitoba were 197, as compared with 135 in Saskatchewan 655 as against 519; in Alberta 582, as compared with 367; and in British Columbia 72, against 14.

Edmonton and expenses statement of the Canadian Pacific Railway for the month of April, issued from headquarters, show the company's net profit up to \$150,944.85 as compared with April of last year. Net profits for the four months to end of April are shown increased by \$1,602,617.72 as compared with the same period of 1927.

The English Rugby League football team, at the present time touring Australia and New Zealand, is scheduled to arrive at Vancouver on R. M. S. Niagara, September 14, and will play a game there next day, leaving on the Trans-Canada afterwards for Montreal, where another game will be played September 20, before sailing for England on the Duchess of Athol next day.

opened an inn to which the soldiers and sailors resorted, and among them in the year 1792 came an English Nelson, the commanding H.M.S. Albemarle, of 26 guns.

"Miss Prentice," says a writer, "is a very young woman."

We cannot wonder at the literary enthusiasm Quebec has provoked.

"The majestic appearance of Cape Diamond," says one writer, "the fortifications, the cupolas, and minarets, like those of an Eastern city, blazing and sparkling in the sun, the noble basin like a sheet of purest silver, in which might ride with safety the navies of the world, the graceful wanderings of the River St. Lawrence, the fertile valley dotted with picturesque habitations, the distant fells of Montserrat, the great purple mountains, the barriers of the North, form a picture which it is no exaggeration to say is unsurpassed in any part of the world."

It is easy to applaud such enthusiasm when one has not set foot in Quebec and been received with that cordial hospitality for which its people are famous.

Naturally, romance is never far away from such a picture. It is a story told of the Lord Nelson, of one Miles Prentice, who served under Wellington and subsequently served Bute. This fellow

About Town and Country

The new concrete sidewalk on the east side of Main Street was completed last week. This is fine improvement and the extension of this work to other sections of Main Street, including crossings, should be given consideration.

Mr. and Mrs. Martin Nisbet who arrived in town this morning accompanied by their daughter Netta, are the guests of their son and daughter-in-law, Mr. and Mrs. Robert Nisbet.

Mr. and Mrs. William L. Irvine left last Sunday for Calgary where they will spend a month previous to residing in Vulcan, where Mr. Irvine has accepted the principalship of the High and Public Schools.

After four years of faithful service as school principal here, his presence in the community will be keenly missed. During his residence in Oyen he took a lively interest in church affairs, being superintendent of the Sunday School for a term, and was an active member, being one of the principal officers of Oyen Lodge.

The good wishes of his many friends here go with him in his new field of activity.

George J. Benbow
PIANIST and TEACHER

The News

Mr. and Mrs. Arthur Johnson left last Sunday by auto for Winnipeg en route to Kennedy Minn. where they will spend a vacation visiting friends and relatives.

Mr. and Mrs. R. E. Gillespie left last Sunday for Winnipeg where they will spend a vacation. They are making the trip by motor.

Mr. John B. Lowe left last Sunday for the coast where he will spend a vacation before returning with Mrs. Lowe and his daughter Phyllis.

Miss Nancy Ferguson and Mr. Arthur Anderson were week-end visitors at the home of the former's parents in Medicine Hat. They returned to Oyen yesterday evening.

Mr. and Mrs. S. A. Noid returned to Oyen yesterday after spending a pleasant vacation in Calgary and Banff.

Mrs. W. T. Walker and her daughter Gladys, left last Sunday to spend a vacation at Banff and Lake Louise.

Mrs. Alf Gibson, accompanied by Beth and Gordon, left last Sunday for Montreal on route to the old country, where they will spend a holiday.

Mr. and Mrs. H. R. Chapin and Mr. and Mrs. W. Walker, returned to Oyen last night after a most enjoyable motor trip to Bellingham, Wash.

The older trees on the boulevards of the village were pruned last week and the weeds and long grass cut down. The difference in the appearance of the avenues so treated is most noticeable and makes the effort well worth while. The many favorable comments passed by visitors on the pleasing appearance of the town, is not to be wondered at and no doubt is gratifying to the members of the council responsible for inaugurating the boulevard tree planting, as well as to the citizens in general.

Sec. 2, Boar over 1 year—1st D. P. Chalmers.

Sec. 3, Sow 6 months or under—1st D. P. Chalmers.

Sec. 4, Boar 6 months or under—1st D. P. Chalmers.

A list of the winners in all classes Hall Exhibits, will be published in next week's issue of the News.

Nelson's Unucky Love Adventure.

Writing in the London "Evening News," Max Pemberton, well-known English writer, says:—

I read in an American magazine a discussion as to which is the most beautiful city in the world; and I am not surprised that the writer names Quebec, and names it with emphasis.

We cannot wonder at the literary enthusiasm Quebec has provoked.

"The majestic appearance of Cape Diamond," says one writer, "the fortifications, the cupolas, and minarets, like those of an Eastern city, blazing and sparkling in the sun, the noble basin like a sheet of purest silver, in which might ride with safety the navies of the world, the graceful wanderings of the River St. Lawrence, the fertile valley dotted with picturesque habitations, the distant fells of Montserrat, the great purple mountains, the barriers of the North, form a picture which it is no exaggeration to say is unsurpassed in any part of the world."

It is easy to applaud such enthusiasm when one has not set foot in Quebec and been received with that cordial hospitality for which its people are famous.

Naturally, romance is never far away from such a picture. It is a story told of the Lord Nelson, of one Miles Prentice, who served under Wellington and subsequently served Bute. This fellow

opened an inn to which the soldiers and sailors resorted, and among them in the year 1792 came an English Nelson, the commanding H.M.S. Albemarle, of 26 guns.

"Miss Prentice," says a writer, "is a very young woman."

We cannot wonder at the literary enthusiasm Quebec has provoked.
